

### AVAILABILITY OF STRUCTURE SLIDES

The Structures Aesthetic and Models Section maintains a large file of 35mm slides which are available for loan when preparing presentations. They are filed by Bridge Number and by some subjects, i.e. Sound Walls, Interchanges, Pile Drilling, etc.

In order to bring the files up-to-date each person presently in possession of slides should provide either the slides or a tabulation of such slides to John Ritner, (5-2138).

This resource will prove valuable to bridge staff.
